

Solving Cellular Connectivity Issues for Business

ABOUT WILSONPRO | PROFESSIONAL-GRADE CELLULAR SIGNAL AMPLIFIERS

Whether it's manufacturing or healthcare, retail or hospitality, sales or management—or virtually any industry in between—mobile devices are critical to job performance at almost any organization.

WilsonPro offers commercial solutions for cellular signal enhancement. Our professional-grade amplifiers work with all major Canadian carrier networks to ensure you get the best signal possible.

Our IC-approved WilsonPro systems are well-suited to overcome any connectivity challenges specific to your building—from office high rise to industrial warehouse. Reliable cell signal can mean increased productivity, greater customer satisfaction, improved security, and much more.

The key characteristics of WilsonPro cell signal amplifiers:

- Boost all current cell signals for data, voice, text.
- Support all mobile devices, all major Canadian carriers.
- Simultaneously boost signal for multiple users.¹
- Self-regulating; no need to retune for best signal.
- Nationwide network of certified installers available.
- The nation's only IC-certified in-line amplifier; featuring the longest cable run (w/o signal loss) in the entire industry.²
- Built in the U.S. and backed by U.S. customer support.
- The only true “cloud-based” remote monitored amplifier with remote system management and firmware updates.³
- The industry's only multi-port output amplifier; resulting in the largest coverage area possible from a single amplifier.
- The only cell signal amplifiers to offer Multi-Tower Targeting (MTT) Technology; featuring our industry-first, three donor-antenna-the port configuration.

¹Except the ProSignal 4G which connects directly to a single device.

²When using the WilsonPro 1050 and inline amplifier with 300' cable.

³Feature exclusive to Enterprise 1300/1300R and Enterprise 4300/4300R.
